MARIA ANGELICA VINESYTHA CHANDRAWAN

Makassar, South Sulawesi | mariangelicaa1412@gmail.com | linkedin.com/in/maria-angelica1214

SUMMARY

Final-year Informatics student specializing in Artificial Intelligence and Machine Learning, with two published journal papers as first author. Experienced in developing AI solutions, including a smart parking system using YOLO and OCR (98.75% accuracy) and an AI-powered pet care application (94% accuracy). Currently building a Retrieval-Augmented Generation (RAG) document Quality Assurance system for my thesis.

SKILLS

AI / ML & Data: Python, Machine Learning, RAG, LLM integration (Gemini API, PaLM), embeddings & vector retrieval, HITL, NLP, Computer Vision (YOLO, OCR), Roboflow, CoreML
Programming & Tools: Swift, SwiftUI, JavaScript, ReactJS, HTML/CSS, REST API, SQL (PostgreSQL, MySQL), Git/GitHub, Figma, Flask, Express.js

PUBLICATIONS

Chandrawan, M. A. V., Syaharuddin, P. T., & Ifkanulsyahdan, R. A. (2025). *PetGuardian: PWA Berbasis AI untuk Deteksi Otomatis Ras dan Penyakit Kulit.* Journal of Computer and Information System (J-CIS), 8(2), 73–84. First author — Gemini API & PaLM; skin-disease detection up to 94%.

Chandrawan, M. A. V., Tanamal, E., Prasetya, A. I. D., Syariati, K., & Suardi, C. (2023). *Rancang Bangun Sistem Manajemen Palang Parkir AI-IoT Otomatis Menggunakan YOLO & OCR.* JTRISTE, 10(1), 41–49. First author — YOLOv4 + OCR; 98.75% plate-detection accuracy.

PROJECT EXPERIENCE

Internal Document Q&A System (RAG + HITL) — AI/ML Developer · Thesis 2025 – Present
Tools: *Python, RAG, LLM, embeddings, vector retrieval, HITL*

- Developing an AI question-answering system that answers from internal documents via a RAG pipeline, grounding responses in source documents to reduce hallucination.
- Designed a Human-in-the-Loop workflow that escalates out-of-scope questions to an admin, ensuring reliable answers and continuous knowledge improvement.

PetGuardian — AI Pet-Care PWA · Lead Developer & First Author 2025
Tools: *Gemini API, PaLM, Roboflow, PWA, ReactJS, Tailwind CSS, Flask*

- Built an AI Progressive Web App for breed identification (Gemini API) and skin-disease detection (PaLM/Roboflow); reached up to 94% accuracy, validated with 45 users.
- Evaluated models with precision/recall/F1-score; published results as first author in J-CIS.

Smart Parking Gate (YOLO & OCR) — AI/Computer Vision · Finalist & Published 2023
Tools: *YOLOv4, EasyOCR, Computer Vision, IoT, Firebase, ESP32*

- Designed an AI-IoT automated parking gate using YOLOv4 for plate detection and OCR for recognition, achieving 98.75% accuracy; finalist at AIoT Competition, Universitas Udayana.

Scheddy — Caddie Scheduling App · Project Manager & Frontend Developer 2025
Tools: *Swift, SwiftUI, REST API, PostgreSQL, Google Cloud Run*

- Led an iPadOS app automating scheduling for 180 caddies at Ciputra Golf; built SwiftUI UIs integrated with a REST API and PostgreSQL, and managed the team timeline.

Other Projects — Talkative, UCM Portal, Curhat-In 2023 – 2025

- Talkative (iOS, CoreML pronunciation coach); UCM Portal & Curhat-In (responsive web platforms in ReactJS with real-time database and chat features).

CERTIFICATIONS

- Natural Language Processing and Computer Vision (MDL-214) — IBM SkillsBuild, 2025
- Build Your First Chatbot (MDL-510) — IBM SkillsBuild, 2025

ACHIEVEMENTS & ORGANIZATION

- Grant Recipient — P2MW: co-founded a 3D printing service; led proposal writing, financial planning, and reporting.
- Public Relations Coordinator (GDSC, 2024–25), Secretary (Orientation Week, 2023–24), Treasurer (Informatics Student Union, 2023–24).

EDUCATION

Bachelor of Informatics — University of Ciputra Makassar 2022 – Present
